INSCRYPTION MODULAR MAP V1.0

This craft was made by Carpengizmat ~ magic-ferret-studios.itch.io ~ Carpengizmat on YouTube

YOU WILL NEED

- **A printer.**
- **Scissors** and a **craft knife.** A paper guillotine is also recommended.
- **A glue stick** and a **glue gun**.
- **Backing material.** You can use cardboard, foam board, or anything like that. You will probably need **about 4 square meters** of backing material.

MAP SECTIONS

1 Print out this document and cut out each of the map sections. You will end up with 16 full-size map sections and 2 half-size ones (start & end).

2 Cut out 24 **8x18 cm** rectangles of backing material, and 6 **4x18 cm** rectangles.

8 X 18 CM X 24

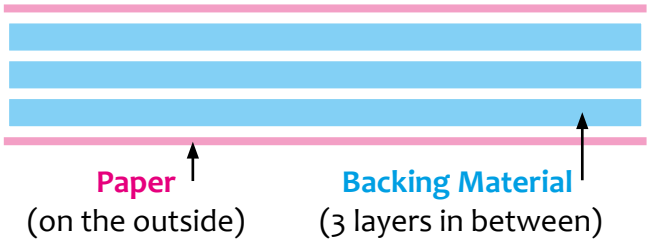
4 X 18 CM X 6

3 Using a glue stick, glue each **full-sized map section** to one of the **large rectangles**, and each **start/ end section** to a **small rectangle.** Cut out all the half-circle token slots, marked with "X".

By this point you should have:

- 16 map sections labelled A to J.
- 8 blank large rectangles (8x18).
- The start and end map sections.
- 4 blank small rectangles (4x18).

4 Using a glue gun, glue **map section A** onto one side of a **large blank rectangle**, and **section B** onto the other side of the same rectangle. You should end up with something that looks like this when looking at it from the side:



5 Repeat step 4, gluing **pairs of map sections** onto blank pieces of backing material, until you have used all pieces.

It is recommended you attach the map sections in these pairs: **A/B, A/B, C/D, E1/E2, F1/F2, G1/G2, H1/H2, I/J**. Map sections labelled '1' and '2' are reflections of each another - e.g. F1 and F2 are mirror images, so you may want to have them attached to each other.

You should end up with **8 map sections** that can be flipped over to show a different map pattern on each side!

6 For the start and end sections, glue 2 of the half-sized rectangles together and then glue the printed map section on top. You should end up with **2 start/end pieces.**

EVENT TOKENS

1 Stick the first page of event tokens (side A) to your backing material, and cut each one out around its circular border.

2 Cut out the other page of event tokens (side B), around their circular borders.

3 Glue each B-side token onto one of your A-side tokens. Make sure to match up the boss fight and starting space tokens with their correct reverse side. Other than that you can glue them however you want.

Once both the map sections and the event tokens are assembled, the modular map system is ready to use!

MAP SECTIONS 1
